ITALIAN CONTEMPORARY

BRAND

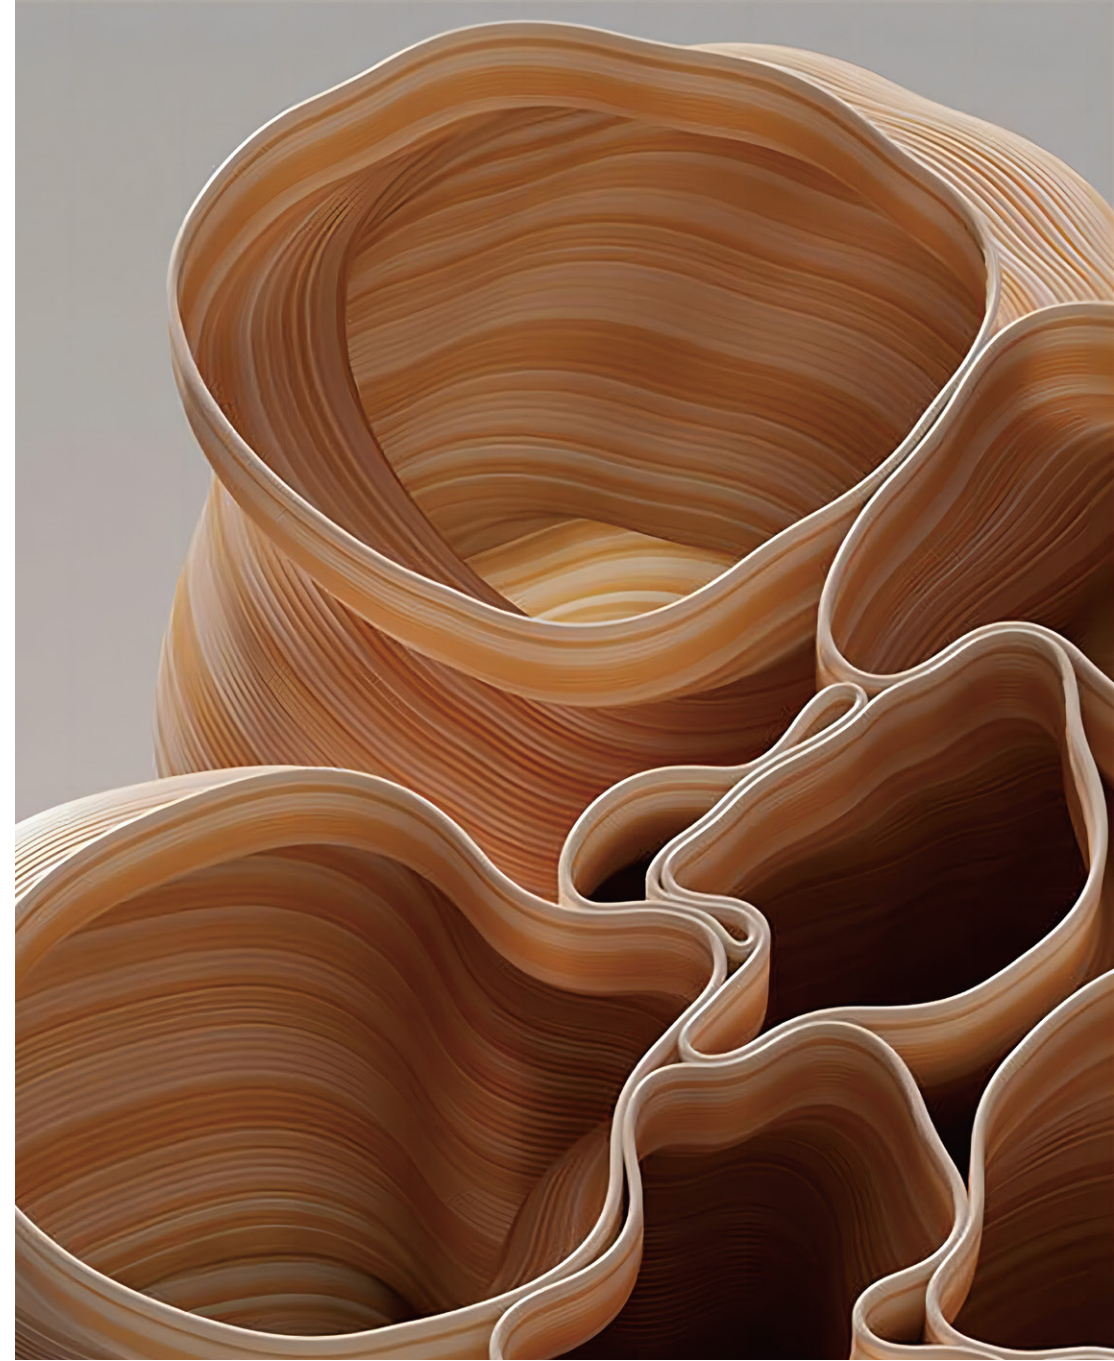

Instead of complex lines and fancy colors, use the best basic elements to build an idealist.

The space takes low saturation color as the keynote, simple and quiet, creating a sense of high class, dark and light decoration, creating a natural and elegant atmosphere.

The overall style of color weakening pure color matching natural materials, space layout is more integrated, different texture collision, create a very interesting element of space.

The space is separated by the differences of elements, which are independent and intimate with each other.

The variation and repetition of core design elements are used to meet various practical functions. The space is rearranged, and the whole used to meet various practical functions. The space is rearranged, and the whole home presents a realistic and stable sense of pleasant beauty.

STYLE INTRODUCTION

Low saturation color is always a kind of healing power, the quiet simplicity and warmth of the space, so that the irritable heart instantly returned to calm, sunlight falls into the space, the texture of the flow of vitality, creating a soft and lazy atmosphere, such a home is the romance of ordinary people.

The sun tipsy, seems to be surrounded by beauty, everything emits a bright taste, the space from the outside to the inside, let you redefine, reexperience a different way of life.

Every detail, the use of texture elements against the rough life, about the layout of the home, not blindly follow the trend is also a kind of ability. Years of cleansing still retain the original quiet, give space a trace of elegance, create push door and enter the moment, all the noise and pressure are calm.
